BVG AGROTECH PRIVATE LIMITED

Spray Solution Quality Enhancer

BVG STICKWET

Advantages:

- Stickwet is ideal spray adjuvant, which is made from high quality surfactants.
- It is Non phytotoxic for crops and noncorrosive for spraying devices as it is Caustic free.
- With it's ultimate wetting action, It helps the spray solution to stick and spread over the leaf and other surfaces.
- It prevents the spray wash off due to rain.
- It reduces the phenomenon of spray drift and thereby cutting off the requirement of spraying solution per acre and spraying cost.
- Due to it's ideal pH, performance of active ingredients from spray solution is improved.
- It improves the herbicidal action of all Weedicides.

How to Use

- Before each spraying, first add Stickwet in appropriate dosage to water, mix well, then add other inputs, again mix well and use for spraying.

Dose

- For regular spraying : 0.5 ML per lit. of water
- For spray in rainy season : 1.0 ML per lit. of water
- For weedicide spray : 1.0 ML per lit. of water

Available packings : 50 ml, 100 ml, 250 ml & 500 ml
